

## CourtTrax offers access to the Federal Bankruptcy Courts

CourtTrax has expanded its services to include access to the Washington State Western and Eastern District Bankruptcy courts. The new search services provide the ability to search the bankruptcy courts for a person or business name very much like CourtTrax services currently available for the Washington State Superior, District and Municipal courts. Whenever possible, the Name Report will include the disposition of the case as part of the index, saving the user the time and expense of retrieving the case summary to verify that the case is closed.

Bankruptcy Case Summary reports are also available. These reports provide a complete summary of the case, without going into the individual docket filings, the status report and other details of the case. A complete list of fields included in the Summary Report is available in the [Federal Bankruptcy Court Help File](#).

### Pricing

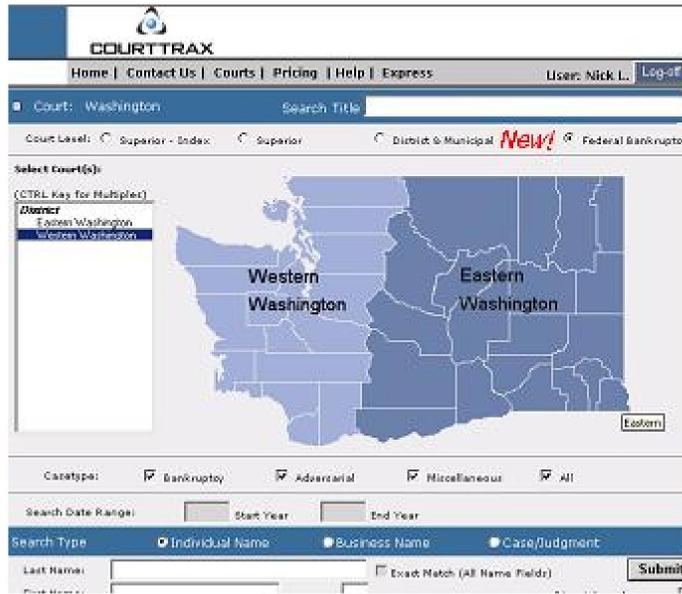

Both the Federal Bankruptcy Name Search and the Federal Bankruptcy Case Summary Report are available at an Introductory Price of 50 cents per search.

### Future Enhancements

Future enhancements will include the ability to retrieve full Case Detail Reports customized specifically to meet your needs. These reports can include any combination of the twelve sections of a Bankruptcy case filing, based on user preferences.

Also in the near future, CourtTrax will offer full access to the Federal District Courts, and the Federal Names Index.

To access the Federal Bankruptcy courts service, logon to CourtTrax,

then at the Court Level choice click on the radio button next to **NEW!** Federal Bankruptcy.

### Reviews: Dispatch and Resume

You can launch a search and immediately begin composing another search using the Dispatch and Resume feature. It is easy to use and saves you time when running multiple searches.

To use Dispatch and Resume, simply complete the search form as usual, then, before you click on the Submit button, click on the Dispatch and Resume box, located directly below the Submit Button. You may dispatch any number of subsequent searches in the same manner.

The CourtTrax search engine works behind the scenes to complete your request allowing you to work uninterrupted.

When the search engine completes each individual search request, the results are placed in your Saved Search Reports.

The Saved Search list panel can be refreshed using the Refresh List link provided on the panel bar. When checked, your search results will not be returned in the browser window. You will be presented a new search form instead. Just hit the Refresh List link to view your recently returned search results. So, when you are in a hurry and have multiple searches to complete, give Dispatch and Resume a try!
