

CourtTrax, Data Trace Sign Exclusive Court Records Agreement

CourtTrax Corporation has announced that it has signed an agreement with Data Trace LLC, the nation's largest provider of title plant services to be the exclusive provider of court records data for seventeen counties in Oregon and Washington, including Seattle, Spokane, Tacoma, Salem, Bend, Medford and Roseburg.

CourtTrax's customized solution integrates their court record search services into Data Trace's nationwide title and tax information system, a product that enables title insurance companies to streamline order processing and title production.

Nick Ledbetter, CourtTrax Founder and CTO noted that this implementation will exponentially increase the efficiency of court records to title plant records conversion. CourtTrax software is developed using progressive development tools and coding techniques, enabling flexibility and scalability, thus easily accommodating Data Trace's future growth.

CourtTrax will provide court data for civil, domestic, probate and judgment cases, in addition to any resultant modifications to those cases.

Cynthia Cole, Data Trace Regional Operations Manager added, "What differentiates Data Trace is the accuracy and timeliness of our data, our rigorous up-front QA processes and our ability to swiftly deal with changes and issues. The addition of CourtTrax as our courts records provider in Oregon and Washington

enhances these core capabilities.

CourtTrax has worked with us to streamline processing of court records, literally saving us hours per day."

Reviews: It's Your Search, Call It What You Will!

When entering a search, any results that are returned will include a system-generated title.

If that naming scheme doesn't work for you or it's just more convenient to use titles that are more aligned with your internal processes, this is a reminder that each time you start a search you can enter a search title of your choosing in the Search Title field. Any future reference to that search will carry the title you have chosen. Just look for the Search Title field at the top of your screen and enter your chosen title before performing your search.

Clues: Its Hiring season again!

The advent of Spring means many things to us; a break in the weather (hopefully), the beginning of another successful season for our Mariners (again, hopefully), and most importantly, it's the time when business really starts to pick up and the need for qualified, reliable employees becomes ever more critical. Although it may sometimes seem like there is never enough time and never enough good prospective employees, the one thing you should be sure to carve out a moment or two for is that all-important step in the hiring process, the criminal background check.

That's where Iris Express comes in. The few seconds it takes to screen applicants for any criminal history using IRIS Express could be the most important part of your candidate evaluation. Powered by CourtTrax, IRIS Express provides you with the information you need to ensure that the decisions you make when hiring are decisions that will help your company prosper and grow.

Click on Search, then Express Criminal Records, as shown above to access IRIS Express.
